Density Mass Volume - Formula Triangle. A handy way of remembering how to calculate either density, mass or volume is to use the triangles below.. The horizontal line means divide and the 'times symbol means multiply.. We then cover up the one we want to find (represented by a red circle) and carry out the calculation with the other two values from the triangle. We have to convert a value from kilograms into pounds. That conversion rate tells us that to get from pounds to kilograms, we would need to multiply by 0.4536.
