Biology Class 12<sup>th</sup> NCERT Solutions

Answer 7.

In vegetative reproduction, there is no involvement of gametes of parents. In this, offspring can be produced by use of body parts such as bulb, tuber etc. Vegetative reproduction is also considered as asexual reproduction in plants. There is no involvement of gametes. Single parent can produce offspring without involvement of sex cells, like eyes of potato can develop into complete potato under favorable condition.

8. Define:

- (a) Juvenile phase,  
(b) Reproductive phase and  
(c) Senescent phase

Answer 8.

- (a) **Juvenile phase**: - Certain minimum age required for the entire organism in their life before they can be sexually active.  
(b) **Reproductive phase**: - After end of juvenile phase organism enter into

9. Draw a well-labeled diagram of an antibody molecule.

Solution:

10. What are the various routes by which transmission of human immunodeficiency virus takes place?

Solution:

The routes by which transmission of HIV takes place is:

- Sexual contact with an infected person
- Use of contaminated needles for drug abuse.
- Transfusion of infected blood.
- Infected mother to fetus.

11. What is the mechanism by which the AIDS virus causes deficiency of the immune system of the infected person?

Solution:

- HIV enters the body through macrophage.
- The viral RNA genome forms viral DNA using reverse transcriptase
- Viral DNA enters the host cell to produce viral particles and turns the macrophage into the viral factory.
- After infecting macrophages, the virus infects T helper lymphocytes and produce more virus particles.
- T helper lymphocytes start decreasing in number.
