Making the Diagnosis of EoE

- Adult presentation: food impaction
- Children: failure to thrive, abdominal pain, vomiting
- Endoscopic confirmation: 15 eos/hpf
- Exclude other causes
- Need 4 biopsies from 2 separate areas
- Doing 6-9 biopsies increases sensitivity
- Do biopsy even if endoscopic appearance is normal

Amgen collaboration In 2020, Amgen and AstraZeneca updated a 2012 collaboration agreement for Tezspire. With common pathways and underlying disease drivers across respiratory and immunology, AstraZeneca is following the science from chronic lung diseases to immunology-driven disease areas. All patients received their prescribed controller medications without change throughout the trial.2 The primary efficacy endpoint was the annualised asthma exacerbation rate (AER) during the 52-week treatment period. AstraZeneca continues to lead development and Amgen continues to lead manufacturing. Based in Cambridge, UK, AstraZeneca operates in over 100 countries and its innovative medicines are used by millions of patients worldwide. AstraZeneca in Respiratory & Immunology Respiratory & Immunology, part of BioPharmaceuticals, is one of AstraZenecaĀĀĀs main disease areas and is a key growth driver for the Company. AstraZeneca AstraZeneca (LSE/STO/Nasdaq: AZN) is a global, science-led biopharmaceutical company that focuses on the discovery, development, and commercialisation of prescription medicines in Oncology, Rare Diseases, and BioPharmaceuticals, including Cardiovascular, Renal & Metabolism, and Respiratory & Immunology. Under the amended agreement, Amgen and AstraZeneca will jointly commercialize Tezspire in North America. For Media contacts, click here. Amgen will record product sales in the US, with AZ recording its share of US profits as Collaboration Revenue.
