Yes. No read load saving writing There has been an error loading the page; Please try to update the page. Sometimes what you don't know can't hurt you, but that's not the case when you buy a used car. As an independent vehicle history supplier, at CARFAX we have done our mission to tell you all you need to know by discovering as many events as possible from the previous life of a used car. Our primary goal is to help you get to know your next car from the inside out before deciding to make an investment that will be part of you and the daily life of your family. We don't think your next car should hide anything from you. The history reports of the CARFAX vehicle contain more than 28 billion historians from 20 European countries, the United States and Canada, who are updated daily with new information. Even if you live in a country from which we do not collect vehicle data, it is stillit is worth checking the vehicle identification number without obligation. The market for imports and exports of used cars is expanding and many owners would be surprised to find out exactly what happened to their vehicle during their previous life abroad. Privacy for customers à Transparency on VeilesLet's be clear: Although we strive to find every detail of the life of a vehicle so far, we are focused only on the history of the vehicle, and we do not collect any information about previous owners. The information we provide relates exclusively to the vehicle, reading the odometer, accidents that have been covered, where the vehicle comes and much more à never becomes personal. We have discovered irreparable damage several times in the past, but other times our controls on the vehicle history draw a vacuum à and sometimes it is a good thing. Second hand - Not According to Best did you know that used cars are sold much more than new ones? We believe this second-hand system is fantastic. However, it is obvious that it gives rise to different methods and tactics: some sellers disemulate a car that was in an accident under a fresh layer of paint, tamper the odometer or conceal theft. This is one of the less attractive aspects of second-hand purchase. Our goal is to establish trustworthy relationships between buyers and sellers, as this is the best way to help customers make the right decision. Your new car should be reliable and make you feel safe, as well as make you feel like you haven't paid too much. But more than anything, we don't want you or your family to sit behind the wheel of a vehicle that's not 100% safe. This is why we strive to remove these vehicles from the road, which not only makes the used car market safer, but also theroads. CARFAX àÀ 35+ Years of Experience in Vehicle History CARFAX was founded in the United States in 1984 and expanded to Europe in 2007. Around 100 team members deployed to six European offices information from 22 countries. The promotion of strategic partnerships with registration authorities, law enforcement agencies, government services, insurance companies, inspection centers and many other leading companies in the world has allowed us to compile a single international database for vehicle histories. We use this database to make the used car market more transparent. We provide everyone in the process of buying a used car access to what is currently the world's most comprehensive source for vehicle history reports, and is growing day by day. We are neutral and independent despite our partnerships our sole purpose is to help clients make an informed choice and ensure their safety and the safety of their family. This includes never collecting personal data àÀ we do not accept any PII from data sources among the information we provide about a vehicle. We ensure that data protection laws are complied with at all times. In addition, we always collect our data in accordance with the legal and regulatory frameworks in all countries where we operate. We expressly distance ourselves from illegal activities such as data theft, scraping and hacking. hacking.
