Aerodynamics for
Engineering Students

Sixth Edition

E. L. Houghton
P. W. Carpenter
S. H. Collicott
D. T. Valentine

$$u \frac{\partial C}{\partial x} + v \frac{\partial C}{\partial y} \delta x \delta y \times 1$$

The diffusion of C across the surface of the control volume is (by analogy with the development of surface forces that led to Eq. (2.65a))

$$\frac{\partial}{\partial x} i + \frac{\partial}{\partial y} j \cdot -D \left(\frac{\partial C}{\partial x} i + \frac{\partial C}{\partial y} j \right) \delta x \delta y \times 1$$

AERODYNAMICS

for ENGINEERING
STUDENTS

A white twin-engine turboprop aircraft is shown from a low angle, flying towards the viewer. The aircraft has two large propellers and is set against a backdrop of a vast, hazy mountain range under a clear sky. The lighting suggests a bright, sunny day. In the bottom right corner, there is a red square logo with the white letters 'BH' inside.
