and installing Apache ActiveMQ to configuring the screen of the new Assigned Port.A.A (Apache Tomcat configuration) screen has been added to the CXSAST installation. This is a collection of scripts, tutorials, source code and anything else that can be useful for use on the field from employees or checkmarx customers.

CXSAST - ENGINE - CLEANUP BATCH FILE Designed for cleaning scans and registers from CXSAST motor server CXSAST - MASSCANSKAN This repository has scanning scripts using CXFLOW or CXCLI. The scripts ingest a text file of the public repository git. The management of the API policy is based on rest and provides the possibility of interrogating the conclusions of Cxosa, allowing you to analyze the security status of CXOSA projects in the organization. The functionality of functionality for policy-apis management was added to the latest management and orchestration API Library: Project Project Apiget Policy by IDADD New Policy set by Policy Policies projects by IDGET

Violations for the project of idCalcoculated Violations for the project Of IDPIOLY APIGET ALL POLICIC POLICYGET POLLICYUPDATE POLICYGET POLICYGET POLICYGET € POLICYGET POLICYGET NEW € ID.RULE RULES ApicategoryFeaturesJenkins Plugin - Apiche, CXOSAA € Configuration for this new version of the CHECKMARX JENKINS plugin for CXSAST / CXOSA, scan selection options (Enable CXSAST / CXOSA) have been separated and can now be individually enabled. All API requests now present the required API version (e.g.v = 2.0) as part of the answer.cxrest API - functionality updated the following APIs have been updated in With the version of the CXREST API library: General Apiget IDGET project details IDGET IDGET Status All Project DetailsEngine Auto Resize Apiget All scan details in Queuecxast Apiget Scan Scan details IDADD / Update A a For IDCreate Scan New ScanCxosa Apiget All Details of the OSA Scan for ProjectCreatate AN OSA Scanning Osa Scan of IDGET OSA Licenseget Scanner Vulnerability OSA For Scan IDCXRest API - Swagnerto Access to the Swagger Environment Navigate in: A, http: // / CXRestapi / Help / Swagger / UI / Index (for example, http: // Localhost / CxRestapi / Help / Swignation / UI / Index) CXSAST SETUP - Motor InstallationCxast Engine Installation Procedure Procedure The wizards have been updated to accommodate the process of Management management and orchestration, installation and synchronization processes. For a single CXEngine installation, the checkmarx license and the HID validation is no longer necessary.Languages à € General) 'State of the consolidated project 'Screen (Dashboard> State of Project) 'CXOSA Viewer' (Dashboard> Status Project> Actions> Open OSA Viewer) CXOSA Application -à, CXOSA settings The default settings for R I Two CXOSA scanning option parameters have been updated in the CXOSA settings (Management> Application Settings> General) based on the type of installation performed. This new screen provides an indication of which third-party components are installed and which components may need to be installed. The installation files for missing components are supplied separately in the CheckMarx directory folder (C: Programs Checkmarx Third_Party) and can be accessible from the Prerequ Wizard screen Isiti. Management of the wizard. DELCHECKMARX management and orchestration (analytics / policy management) is now part of the default CXSAST installation. installation.
